Education

Symbiosis International University — Nagpur, Maharashtra
Bachelor of Technology in Computer Science, Major in AI/ML — *Aug. 2024 – May 2028*

Radha Junior College — Nagpur, Maharashtra
Higher Secondary Certificate (HSC) – Class XII, Science (PCM) — *June. 2022 – April 2024*

Technical Skills

Languages: Java, Python, SQL (Oracle), JavaScript, HTML/CSS
Frameworks: React, Node.js,Express.js, Flask, FastAPI,PyTorch,TensorFlow / Keras, REST APIs, Linux
Developer Tools: Git, Google Cloud Platform, VS Code, Visual Studio,Jupyter Notebook, Google Colab, Eclipse
Libraries: pandas, NumPy, Matplotlib, Scikit-learn, Seaborn

Achievements

- **Published Patent:** Predictive framework using ARIMA and LSTM for financial time-series forecasting.
- **Top Performer, IRP:** Certificate of Achievement for ranking among top performers at SIT Nagpur (2025–26).
- Participated in SIT Nagpur Enthusia 5.0 Boardroom Battle.

Experience

AI/ML Intern — May 2026 – June 2026
Maincrafts Technology — *Remote*
- Built ML models for house price prediction and customer churn classification using Python and Scikit-learn.
- Applied EDA, cross-validation, and GridSearchCV, reducing test RMSE from 0.7242 to 0.6389.

Python Programming Intern — Mar. 2026 – Apr. 2026
Kodbud — *Remote*
- Developed Python applications including a Number Guessing Game, Password Strength Checker, and CLI Chatbot.

ServiceNow Virtual Intern — Sep. 2025 – Oct. 2025
SmartBridge – ServiceNow Virtual Internship Program — *Remote*
- Completed training in ServiceNow Administration, Agentic AI, Flows, ATF, Reports, and CSA exam preparation.

Projects

Time Series Forecasting using ARIMA and LSTM | *Python, TensorFlow, Keras, Statsmodels*
- Developed a time-series forecasting model for stock prices using ARIMA and LSTM on historical financial data.
- Applied preprocessing, normalization, differencing, sequence windowing, and Gaussian filtering; evaluated models using RMSE, MAE, MAPE, and R^2.
- Achieved RMSE of 3.76 and R^2 of 0.9599 with the Simple LSTM model on Google stock-price data.

Stock Price Prediction Platform | *Python, FastAPI, React, Scikit-learn, TensorFlow, ARIMA, yfinance*
- Built a full-stack dashboard to retrieve 2 years of stock data and generate 5–90-day forecasts using ARIMA, LSTM, Gradient Boosting, and ensemble models.
- Implemented backtesting using RMSE, MAE, MAPE, R^2, and directional accuracy to evaluate forecasting performance.
- Developed interactive React visualizations for historical prices, forecasts, market statistics, and prediction intervals.

ExfilSentinel: Insider Data Exfiltration Detection | *Python, FastAPI, React, MongoDB, Scikit-learn, XGBoost*
- Built a privacy-preserving SOC platform to detect insider data exfiltration from behavioral telemetry without inspecting user file contents.
- Developed a 3-model ML ensemble using Isolation Forest, Random Forest, and XGBoost to analyze 12 metadata signals, generate 0–100 risk scores, classify attack vectors, and provide explainable feature contributions.
- Delivered real-time alerts, attack simulation, endpoint monitoring, and automated containment workflows; achieved 94.6% accuracy and 90.9% F1 score with XGBoost on a 1,000-sample holdout set.
